RE: Marsh Sideroad – Cost of Surface Treatment
Report No.: MS 2018 - 43

AIM

To provide Council the cost of applying asphalt surface treatment to Marsh Sideroad.

BACKGROUND

During the September 24th 2018 Council Meeting, the following motion was approved:

536-2018

Moved By Councillor Larry Patterson

Seconded By Councillor Thomas Neufeld

That Administration prepare a report regarding when the gravel portion of Marsh Sideroad beginning at Highway 3 to County Road 27 will be surface treated, tar-and-chipped, or asphalted as residents have appeared before Council and have had no answers as to when this will be completed.

DISCUSSION

The gravel segment of Marsh Sideroad as identified above measures approximately 1,472 meters in length. There are seven residential properties within this segment, all of which are surrounded by agricultural farmland. The average daily traffic as identified in the 2011 Kingsville Roads Needs Study is 104 vehicles.

Surface treatment of Marsh Sideroad is not identified as a priority or recommended initiative in the Kingsville Transportation Master Plan or the Municipal Services Five Year Capital Plan. As a result, there are no immediate or short term plans for applying surface treatment to this road segment.

A resident of this road segment recently requested new gravel be added to the roadway to improve grading and drainage conditions. This work is scheduled for completion in October of 2018 using funds allocated in the Public Works Operations Budget.

LINK TO STRATEGIC PLAN

To become a leader in sustainable infrastructure renewal and development.

FINANCIAL CONSIDERATIONS

The approximate cost of applying asphalt surface treatment to Marsh Sideroad from County Road 27 to Road 8 West is \$115,000.
