January 3, 2020

RE: ESSEX REGION CONSERVATION AUTHORITY 2020 DRAFT BUDGET: 30 DAY NOTICE TO MEMBER MUNICIPALITIES

At our December 12, 2019 meeting, the Essex Region Conservation Authority Board of Directors approved our Draft 2020 Budget for distribution to municipalities; and provide notice that a weighted vote will be held at the Board of Directors meeting on February 13, 2020. Ontario Regulation 139/96 (as amended by O.R. 231/97) requires that affected municipal partners receive a minimum a 30-day notice for which a meeting where a weighted and recorded vote will be taken. The Regulation also requires that the notice be accompanied by the financial information used to determine that levy.

As described in the Draft 2020 Budget (attached), the budget totals \$10,576,317 and includes a total levy contribution from member municipalities of approximately \$3,386,667. This levy totals \$10.49 for every person in our watershed, based on data compiled by MPAC and the Ministry of Natural Resources and Forestry, though the actual cost per household of \$250,000 decreased by \$0.12 to \$19.57.

ERCA was able to reduce the projected impact of the budget with confirmed funding related to the Windsor Essex Climate Change Collaborative (WEC3) and the development of a Regional Municipal Energy Plan, continued support from the province for the John R. Park Homestead Community Museum Operating Grant and confirmed funding related to Source Water Protection, Detroit River Canadian Cleanup, and watershed research that will partially offset permanent staff and associated shared costs.

We believe the 2020 Budget strives to strike a balance between meeting the sustainability needs of our region, while continuing to recognize the fiscal realities of our municipal partners. The expertise that ERCA provides is a cost effective way to manage regional environmental priorities. Uniquely, we provide a significant cash return on investment in addition to the programs and services we provide municipalities. ERCA continues to rank in the top 10 of all Conservation Authorities for the programs and services we provide our region, yet our combined levies fund less than 40% of our operations, placing ERCA in the bottom five of all Conservation Authorities and well below the provincial average.

Should you have any questions regarding our budget, please do not hesitate to contact me. I will also look forward to presenting our 2019 Annual Report to each municipality in the New Year.

Thank you,

Richard J.H. Wyma
General Manager/Secretary-Treasurer

Shelley McMullen
Director, Finance and Corporate Services

Attachments: Report BD44/19 – ERCA Draft 2020 Budget

Essex Region Conservation Authority Board of Directors BD44/19

From: Richard J.H. Wyma, General Manager/Secretary-Treasurer
Shelley McMullen, Director, Finance and Corporate Services

Date: December 6, 2019

Subject: 2020 DRAFT Budget

Strategic Action: All

Recommendation: THAT the 2020 Draft Budget be approved by the Board of Directors for review by and input from member municipalities; and further,

THAT the 2020 Draft Budget be forwarded to Municipalities for consideration and input as part of the process of formal approval; and further,

THAT notice be given that, in accordance with the *Conservation Authorities Act*, there will be a weighted vote on the 2020 Draft Budget at the Board of Directors Meeting on February 13, 2020.

Summary

- The 2020 Budget totals \$10,576,317, which includes a total levy contribution of \$3,386,667. This represents an increase of \$148,000, or \$0.49 per person (\$10.00 to \$10.49 per person) though the actual cost per household (\$250,000) decreased by \$0.12 to \$19.57.
- A robust suite of high priority projects and programs to protect and restore the natural environment of the region will be undertaken. These include programs to increase habitat and forest cover, maintain and expand conservation areas and trails, aid our member municipalities in protecting people and infrastructure from the dangers of flooding and erosion particularly in the era of a changing climate, and to provide meaningful education and engagement opportunities for our residents.
- The proposed levy increase amount is primarily a result of the decrease in provincial transfer payments relating to the Flood Forecasting program (\$98,000) and costs associated with human resources. However, no new FTEs are included in this budget and some staffing positions will remain unfilled due to consideration of municipal budgets and respective pressures.
- ERCA was able to minimize levy increase with confirmed funding related to the Windsor Essex Climate Change Collaborative (WEC3) and the development of a County Municipal Energy Plan, continued support from the province for the JRPH Community Museum Operating Grant and confirmed funding related to Source Water Protection, DRCC and watershed research that will partially offset permanent

staff and associated support and shared costs and reallocations from Land Acquisition as approved by the Finance and Audit Advisory Board.

- ERCA's Annual Revenues for programs and services ranks consistently in the top 10 of all 36 Conservation Authorities. At the same time, ERCA's operational levy funds less than 40% of its operations, placing ERCA in the bottom five of all Conservation Authorities, and well below the provincial average (approx. 50%).
- The expertise that ERCA provides is a cost effective way to manage regional environmental priorities. Uniquely, ERCA provides a significant cash return on investment in addition to the programs and services we provide municipalities.

Discussion

Each year, administration undertakes a comprehensive review of its programs and most pressing needs associated with annual budgets. These issues, challenges and opportunities were reported to the Board in September 2019 (BD23/18). At the time, due to uncertainties with provincial funding, Administration projected an operating deficit of between \$375,000 and \$560,000.

Since September, ERCA has confirmed continued provincial support for the Source Water Protection Program, Detroit River Canadian Cleanup, the Kingsville Leamington Nutrient Study, and the JRPH Community Museum Operating Grant. These are projected revenues into 2020, however there remains concerns regarding long term funding of these initiatives.

While the budget is represented as 'balanced', it was effected through a proposed levy increase of \$148,000 (primarily a result of the decrease in provincial transfer payments relating to the Flood Forecasting program (\$98,000) and costs associated with human resources) and reallocation of CW~GS land securement funding of almost \$69,000. The total operating deficit for 2020, before proposed levy increases and levy reallocations was reduced from a projected \$315,000 as identified in the 2020 Budget Pressures Report to ~\$217,000, significantly lower than the potential projected high of \$560,000.

To offset this deficit, and in attempting to strike an efficient balance between meeting the sustainability needs of our region and address our pressing organizational challenges to meet program delivery standards the ERCA Finance and Audit Advisory Board (FAAB) and Administration recommended an increase in levy of \$148,000, which brings total levy from \$3,238,667 to \$3,386,667. This is an increase of \$0.49 per person, though the actual cost per household (\$250,000) decreased by \$0.12 to \$19.57.

The remaining projected operating deficit of ~\$69,000 was addressed through a redirection of land securement funding as recommended by Administration and the FAAB. The CW-GS levy directed to land securement will be reduced from \$589,600 to \$420,780, inclusive of the \$69,000 as noted above plus \$50,000 will be directed to the insurance reserve (depleted due to wind storm damage deductibles) and \$50,000 to the

infrastructure reserve in anticipation of higher than expected HBCA workshop replacement costs.

Contributions and repayments to reserves will be \$324,250 and transfers from reserves are estimated to be \$803,500 for a projected net reduction of \$479,250 in reserve funds. Transfers to reserves include: infrastructure (\$250,000), replenishment of insurance reserve (\$50,000) and multi-year pledge payments from ERCF (\$14,250).

The 2020 Draft Budget continues to include a broad array of programs to: increase habitat and forest cover; maintain and expand conservation areas and trails; assist our member municipalities in protecting people and infrastructure from the dangers of flooding and erosion; lead the development of a Regional Climate Change Strategy and the Place for Life Policies; and provide meaningful education and engagement opportunities for our residents.

However, as funding programs change and evolve with changes in government priorities, and as new interests seek funding, it is harder to support key programs with external support – programs that are funded by levy in other conservation authorities. In addition, while this builds a strong case for support, it is only enough to maintain the 'status quo'. It is not enough to improve the health of our watersheds, keep beaches open more, deal with phosphorous and blue-green algae in our lakes, provide open spaces and trails that are accessible for people to use, connect and restore forests, wetlands and habitats. These are essential for sustainable communities to build resilience to climate change, and importantly, attracting and retaining the talent this region desires.

Administration is recommending approval of a draft 2020 Budget in the total of \$10,576,317, which includes a total levy contribution of \$3,386,667. This represents an increase of \$148,000, or \$0.49 per person (\$10.00 to \$10.49 per person) based on watershed population and Current Value Assessment data provided by the Ministry of Natural Resources and Forestry; and including information as determined by the Municipal Property Assessment Corporation (MPAC).

Once approved, the draft 2020 Budget will be circulated to member municipalities for approval, and a weighted vote will be undertaken in February.

2020 DRAFT BUDGET

December 6, 2019

EXECUTIVE SUMMARY

- The 2020 Budget totals \$10,576,317, which includes a total levy contribution of \$3,386,667. This represents an increase of \$148,000, or \$0.49 per person (\$10.00 to \$10.49 per person) though the actual cost per household (\$250,000) decreased by \$0.12 to \$19.57 .
- The proposed levy increase amount is primarily a result of the decrease in provincial transfer payments relating to the Flood Forecasting program (\$98,000) and costs associated with human resources. However, no new FTEs are included in this budget and some staffing positions will remain unfilled due to consideration of municipal budgets and respective pressures.
- ERCA was able to minimize levy increase with confirmed funding related to the Windsor Essex Climate Change Collaborative (WEC3) and the development of a County Municipal Energy Plan, continued support from the province for the JRPH Community Museum Operating Grant and confirmed funding related to Source Water Protection, DRCC and watershed research that will partially offset permanent staff and associated support and shared costs.
- ERCA's Finance and Audit Advisory Board recommended a reallocation of \$168,820 from Land Securement to offset deficit, a redirection of \$50,000 to the insurance reserve which was depleted due to wind storm damages in 2019, and \$50,000 to the infrastructure reserve in anticipation of higher than expected HBCA Workshop replacement costs. If these funds are not required in 2020, they will remain in the Land Securement reserve.
- In 2020, ERCA will continue to deliver programs to increase habitat and forest cover, maintain and expand conservation areas and trails, assist our member municipalities in protecting people and infrastructure from the dangers of flooding and erosion, lead the development of a Regional Climate Change Strategy and Regional Municipal Energy Plan, the Place for Life Policies, and provide meaningful education and engagement opportunities for our residents.
- ERCA's Annual Revenues for programs and services ranks consistently in the top 10 of all 36 Conservation Authorities. At the same time, ERCA's operational levy funds less than 40% of its operations, placing ERCA in the bottom five of all Conservation Authorities, and well below the provincial average (approx. 50%).

ERCA At-A-Glance

ABOUT ERCA

ERCA is a local watershed management agency, incorporated under the *Conservation Authorities Act* (1946). Since our establishment in 1973, we have been dedicated to protecting, restoring, and managing the natural resources of the Essex Region. Today, as one of 36 conservation authorities in Ontario, ERCA is committed to the core founding principles of the *Conservation Authorities Act*: watershed jurisdiction, local decision-making, and funding partnerships.

ERCA works with residents and communities, our nine member municipalities, senior levels of government, and agencies to increase natural area coverage through tree planting and habitat restoration, improve water quality across our watersheds and our Great Lakes, protect people and property from flooding and erosion, and further our understanding of the environment through science and education. Our goal is a sustainable future which improves our local environment and helps create an enhanced community identity we can all be proud of, and a more vibrant economy that can set this region ahead of others - one where people will want to live, work, play, and invest in.

ERCA is governed by a 19-member Board of Directors appointed within a four-year cycle by its 9 Member Municipalities. The Board's Chair and Vice-Chair are elected for two year terms, alternating between City of Windsor, and the municipalities outside the City of Windsor.

OUR REGION

The Essex Region is an 1,841 square kilometre area of land that spans nine municipalities, including the City of Windsor, Township of Pelee Island, and the Towns of Amherstburg, Essex, Kingsville, Lakeshore, LaSalle, Leamington and Tecumseh. It is the southern-most part of the Carolinian Life Zone and contains some of Canada's most significant natural areas. Unlike most other Conservation Authorities, which generally focus on one large watershed, our region includes the watersheds of the Detroit River, Lake St. Clair, and western basin of Lake Erie. It is surrounded by almost 300km of Great Lakes shorelines, the largest freshwater system in the world. The region is blessed with a climate and geography that supports a rich agricultural and industrial tradition that has supported growth in our region. But, there are also significant challenges.

- Our landscape has been intensively developed. In 200 years, we've drained more than 95% of our wetlands, lost almost all of our tall grass prairie and cleared more than 90% of our forests. What's left is disconnected and fragmented. Few parts of Canada have been as extensively developed as Essex Region.
- Our Great Lakes watersheds are impacted by invasive species, nutrients, phosphorous and blue green algae. The water quality of our rivers and streams is degraded, which impacts aquatic wildlife, increases drinking water treatment costs, and negatively impacts recreational use such as swimming and boating.
- Changing and unpredictable climate patterns are causing significant flooding, impacting our shorelines, and creating erosion problems. And the frequency of these types of rainfall events are expected to increase.
- While the Windsor-Essex region is identified as a high growth area, our low lying landscape, flat topography and soils create unique development challenges. Planning for growth and resilient communities and climate change will require different strategies and a more integrated approach.

OUR STRATEGIC DIRECTION

Defined by our mandate under the Conservation Authorities Act (1946), ERCA delivers a number of programs and services to municipalities and residents. Our Strategic Direction is set out in ERCA's 2016-2025 Strategic Plan: Sustaining the Place for Life, which provides the basis for our decision-making and

The **Place for Life** reinforces that all elements of a place are interconnected – our community, its environmental health, healthy lifestyles for our citizens and our economy. Life recognizes our living, thriving and sustainable natural systems. Life refers to the people of our community – their health and protection and our shared heritage. We embrace this place and make it our home. For life.

We **envision** Essex Region as a sustainable, resilient and vibrant place with healthy and thriving watersheds, Great Lakes and a green culture.

Our **mission** is to improve our environment to enrich our lives.

priorities over the decade in five key areas:

1. **The climate will continue to change.** Efforts to slow climate change must continue, but we need to help our partners prepare to adapt to its impacts.
2. **The Great Lakes are our most significant natural resource.** Our 2017 Watershed Report Card identified failing grades for surface water quality in virtually every watershed. More must be done to protect and improve water quality.
3. **Our habitats are among the most significant in Canada.** We have planted more than 6 million trees and achieved 8.5% natural area coverage. But more action is needed to reach our 12% target.
4. **Our urban areas will continue to grow and expand.** ERCA will need to continue to work with all partners to plan sustainable communities that reduce urban sprawl, are walkable, have a healthy food supply and incorporate green infrastructure.
5. **ERCA is a sustainable, resilient and valued agency.** Since 1973, ERCA has been striving to achieve a state of sustainability for the Essex Region. It is also important to consider the sustainability of ERCA as an organization

BUDGET CONSIDERATIONS

The Essex Region has seen first-hand the challenging and costly impacts of climate change, growth, loss of wetlands and habitats, pollution, impaired Great Lakes water quality, and many other stressors on our environment.

The health of our rivers and streams are poor, and our Great Lakes are enormously disrupted. The Leamington tributaries have been identified as Priority Watersheds under the Great Lakes Water Quality Agreement due to high levels of phosphorous, which is the leading cause of microcystins and harmful algal blooms in the western basin of Lake Erie. We are facing heightened challenges related to climate change and unpredictable weather patterns and severe storms that test our stormwater infrastructure resulting in both urban and overland flooding and, combined with record high water levels, have greatly impacted our shorelines and municipal infrastructure and require additional monitoring and flood advisories. Invasive species such as Phragmites threaten our wetlands and drainage systems, reduce biodiversity and habitats, and the overall health of our watersheds. New threats, such as Oak Wilt, have the potential to significantly damage our natural areas. These issues are integrated, and with greater urgency, a regional, coordinated effort is required.

Conservation Authorities are recognized for their efforts to address these challenges through integrated watershed planning and management. The recently updated *Conservation Authorities Act* changes the way conservation authorities deliver programs and services, but continues to recognize that Conservation Authorities' objects remain conservation, restoration, development and management of natural resources, which we do on a watershed basis. The 2018 Lake Erie Action Plan lays out 125 actions that includes opportunities for conservation authorities and other partners in the delivery of actions associated with reductions in phosphorous. The recently released Provincial Environment Plan: Preserving and Protecting our Environment for Future Generations commits to continue to work with Conservation Authorities on many different initiatives in order to help ensure the health of our lakes, rivers and greenspaces, protect important sources of drinking water and commits support for the important role of conservation authorities in protecting people and property from flooding and other natural hazards, and conserving natural resources.

BUDGET PRESSURES

The Draft 2020 Budget considers and responds to these challenges and reflects key priorities in the 2016-2025 Strategic Plan: Sustaining the Place for Life. While ERCA has been recognized as a leader in leveraging local funding to deliver key programs, changes in government and funding program priorities, increased competition for limited funding, and narrowing of program scope makes this increasingly challenging.

Legislative and Regulatory Change

Changes to Legislation and Regulation: Bill 108, the More Homes, More Choices Act, 2019 introduced changes to how Conservation Authorities structure their programs. Though the legislation did not change the objects of an Authority, which remain “to provide, in the area over which it has jurisdiction, programs and services designed to further the conservation, restoration, development and management of natural resources other than gas, oil, coal and minerals”, ERCA will work with other Conservation Authorities, Conservation Ontario, Municipalities and the Province on the regulations that will define the activities to be delivered as part of Provincially Mandatory Programs and Services (Risk of natural hazards, conservation and management of CA owned or controlled lands, drinking water source protection, and other programs or services as prescribed by regulation), and those Municipal and Conservation Authority led programs which are to be delivered through Agreements with municipalities. Once regulations are drafted, the legislation provides for a Transition period for conservation authorities and their member municipalities to restructure budgets to fully reflect provincial and municipal program delivery, develop agreements with municipalities and work through any other details. Until then, ERCA will continue delivering the important activities needed to address the issues in our region.

Provincial Transfer Payments

ERCA delivers its delegated Flood Protection and Source Water Protection programs through provincial transfer payments. In 2019, provincial support for flood protection was reduced by 50% and there was uncertainties regarding funding for Source Water Protection. These programs have been identified as mandatory programs, which raises some uncertainty regarding future provincial support.

Provincial Special Grants

ERCA receives provincial Special Grants to deliver provincial programs, including the Detroit River Canadian Cleanup (provincial funding is matched with federal funding for ERCA to coordinate the Detroit River Remedial Action Plan), projects under the Canada Ontario Agreement to monitor phosphorous in priority watersheds through the Kingsville Leamington Nutrient Study, and support for agricultural stewardship programs to help achieve targeted reductions of 40% in Lake Erie. ERCA also receives support from the Province through the Community Museum Operating Grant for the John R. Park Homestead. These provincial special grant programs were supported in 2019 and are confirmed for at least part of 2020, though future support continues to be a concern.

Landowner Incentives

Recent cuts to funding for restoration, tree-planting, and wetland and prairie restoration which ERCA received and directed to landowner incentive programs, will likely impact future restoration of the region's natural areas, in the absence of increased funding from other partners including the federal government. In addition to losses of provincial support for projects, the federal government funding for some aspects of our farm stewardship programs has diminished significantly. As a result, many of the farm related services such as the creation of buffer strips to improve water quality may be eliminated.

Overreliance on External Funding

Improving water quality and overall watershed health is critical to our region and requires support for positions that undertake the research, monitoring, and partnerships; and for managing and maintaining data information systems. The information collected and gathered is relevant to watershed management, and contributes to evidence-based decision-making.

However, ERCA is distinctly different from its municipal partners and other Conservation Authorities in how it has historically financed these programs, and its board-approved mandate. Unlike municipal operations, levy funding supports less than 40% of ERCA's operations and programs, with the other 60% funded through various Provincial grants, including the Drinking Source Water Protection program and the Section 39 Operating Grant and Federal grants are all identified as concerns.

This overreliance on external funding means these programs, which are core to improving and maintaining the health, safety and sustainability of our region are almost entirely funded through external grants. This also means that these programs, while producing beneficial outcomes, apply to areas where funding is available, not necessarily in those areas with greatest need or greatest priority. At the same time, reductions or eliminations in funding as identified above mean key initiatives are no longer supported or significantly reduced. While Administration continuously seeks additional resources through external funds, stable financial support is crucial in developing knowledge, so that the region's environmental problems can be addressed.

Capacity to Act and Respond.

ERCA, not unlike municipalities and other agencies, is facing numerous capacity pressures including: increased landowner/stakeholder interaction in a number of departments; increased volume of development and planning applications; compliance-based reporting and monitoring; increased visitation to conservation areas, and outreach and stewardship.

In addition, because of ERCA's expertise and knowledge of watersheds and hydrological conditions, municipalities are requesting that ERCA participate in, or coordinate resource studies, master drainage plans, Environmental Assessments, and other operational initiatives. ERCA's technical knowledge of our watersheds and the complex legislative and regulatory environment is both valued and necessary to ensure development is sustainable, responsible, and proactively addresses and anticipates issues. ERCA's involvement on these initiatives is primarily with municipalities, and as such, there is limited cost recovery mechanisms to support staff. As the focus of our corporate approach continues to shift to a more proactive planning process, additional staff capacity will be required in municipal plan input and review.

The 2020 Draft Budget addresses cuts to provincial supports that funded this capacity and has not provided for any additional capacity to review and issue permits and respond to planning applications, address ongoing compliance and best-practice initiatives relating to H&S, MFIPPA and general administration, HR, Finance & IT/IS. The lack of capacity will continue to place demands on watershed management staff, and administrative and support staff

Fixed Cost Increases

The current Collective Agreement with CUPE Local 3784 expires on December 31, 2019. ERCA will be negotiating a new Collective Agreement with its employees and has identified pressures associated with benefit premiums that will need to be negotiated along with salary increases and other proposals. In addition, upward movement on the grid for eligible positions is estimated to be more than \$130,000 in 2020. In 2019, ERCA did not fill vacant positions in Conservation Services and Corporate Services, which will remain unfilled in 2020. Other than those positions, ERCA also anticipates a full complement of program staff. ERCA must also fund fixed costs associated with leasing office space within the County of Essex Civic Centre, and costs for taxes, utilities and services at Conservation Areas. Because of ERCA's revenue structure, it is expected that only a portion of those increases will be levy-driven (ranging from 50%-70%), with the remainder absorbed in grant-funded special projects.

Corporate Recoveries

Special grants and third-party fee for service projects reduce the levy burden, as wages for permanent staff and corporate administration are often allowable expenses in the agreement or contract. When these revenues are reduced, a funding gap is created. High levels of special grants and fee for service contracts in recent years, have been a primary driver of the Authority's positive financial results.

FINANCIAL SUMMARY

While the budget is represented as 'balanced', it was effected through a proposed levy increase of \$148,000 and reallocation of CW~GS land securement funding of almost \$69,000. The total operating deficit for 2020, before proposed levy increases and levy reallocations was ~\$217,000, significantly lower than \$315,000, as initially identified as the potential deficit in the 2020 budget pressures report. The \$100k reduction was achieved through the addition of:

- expected 3rd party funding relating to the regional climate change collaborative;
- continuation of the JRPH Community Museum Operating transfer payment; and
- anticipated government grants related to Source Water Protection, DRCC and watershed research that will partially offset permanent staff and associated support and shared costs.

As recommended by the ERCA Finance and Audit Advisory Board (FAAB) and Administration, the increase in proposed levy is \$148,000 from \$3,238,667 to \$3,386,667. This is an increase of \$0.49 per person, though the actual cost per household (\$250,000) decreased by \$0.12 to \$19.57.

The proposed levy increase amount is primarily a result of the decrease in provincial transfer payments relating to the Flood Forecasting program (\$98,000) and costs associated with human resources. However, no new FTEs are included in this budget and some staffing positions will remain unfilled due to consideration of municipal budgets and respective pressures.

The remaining projected operating deficit of ~\$69,000 was addressed through a redirection of land securement funding as recommended by Administration and the FAAB. The CW-GS levy directed to land securement will be reduced from \$589,600 to \$420,780, inclusive of the \$69,000 as noted above plus \$50,000 will be directed to the insurance reserve (depleted due to wind storm damage deductibles) and \$50,000 to the infrastructure reserve in anticipation of higher than expected HBCA workshop replacement costs.

Contributions and repayments to reserves will be \$324,250 and transfers from reserves are estimated to be \$803,500 for a projected net reduction of \$479,250 in reserve funds. Transfers to reserves include: infrastructure (\$250,000), replenishment of insurance reserve (\$50,000) and multi-year pledge payments from ERCF (\$14,250).

2020 Draft Municipal Levy Allocation									
	CVA %		GENERAL LEVY		CW~GS LEVY		TOTAL LEVY		CHANGE
	2020	2019	2020 DRAFT	2019 APPROVED	2020 DRAFT	2019 APPROVED	2020 DRAFT	2019 APPROVED	\$ %
Amherstburg	5.95%	5.91%	\$138,948	\$129,412	\$62,437	\$62,084	\$201,386	\$191,496	\$9,890 5.2%
Essex	4.79%	4.82%	\$111,810	\$105,388	\$50,243	\$50,559	\$162,052	\$155,947	\$6,105 3.9%
Kingsville	6.15%	6.17%	\$143,820	\$134,969	\$64,626	\$64,750	\$208,446	\$199,719	\$8,727 4.4%

Totals	100%	100%	\$2,336,667	\$2,188,667	\$1,050,000	\$1,050,000	\$3,386,667	\$3,238,667	\$148,000 4.6%

**2020 ERCA BUDGET:
\$10,576,317**

- Conservation Services \$5,106,848
- Watershed Management \$1,456,585
- Watershed Research \$1,071,050
- Community Outreach \$511,300
- Corporate Services \$978,534
- Capital \$1,452,000

**TOTAL REVENUES:
\$10,576,317**

**TOTAL EXPENDITURES:
\$10,576,317**

WHERE DOES YOUR \$10.49 GO?

KEY ASSUMPTIONS

- That fee-for-service revenues relating to Watershed Management Services will stabilize at 2019 levels;
- That revenues of \$546,000 for development applications and surveying fees will continue;
- That the revenues that were impacted by storms/floods will return to pre-2019 levels (hunting/camping/farm leases);
- That grants will be available to support the new climate change regional initiative (~\$46,000);
- The Provincial Section 39 Flood Forecasting & Warning program transfer payment will be maintained/capped at \$104,417
- That the Drinking Water Source Protection activities will be funded at 100% of projected program costs (~\$96,000)
- That municipal transfer payments of \$2.5M will be contributed for the Peche Island project
- That significant watershed science and research grants will be approved (\$473,000)
- That provincial transfer payments for DRCC activities will continue to October 2020
- That revenues for the new JRPH Heritage Centre will begin in 2021 and construction will somewhat impact 2020 revenues.
- That CW~GS restoration revenues will continue to be impacted by loss of provincial special grant programs for tree planting and wetlands but 2020 operations will be funded with remaining deferred revenues but expected to be depleted in 2021.
- That fee-for-service work for invasive species removal at Spring Garden will be negligible for 2020.

SUSTAINING THE PLACE FOR LIFE

As an integrated watershed management agency, our business is built on programs and services that support our region's ecological, social, and economic health.

ERCA employs 38 full-time and long-term contract staff across numerous professional fields, supported by shorter term and seasonal staff, led by a six person management team with over 100 years of experience and knowledge of the Essex Region.

Our watershed management and conservation services programs have recognized experts in water resources and watershed engineering, watershed planning, forestry, biologists, ecologists, agronomists, water quality scientist, and experts in conservation, restoration and natural resource management.

Our education and outreach team includes professional staff who are trained in delivering formal curriculum-based education programs to children, and youth; and in delivering programs and events to engage citizens of all ages in making a meaningful and lasting connection with Lake Erie, Lake St. Clair and Detroit River watersheds.

These teams are championed and supported internally by an equally broad range of experts delivering strategic leadership and essential services including human resource management, financial planning and management, geographic information systems and information technology, corporate communications, public and media relations, graphic design, event planning and marketing.

While we have a long and accomplished history as expert practitioners, we don't do it alone. We are continually establishing and reaffirming partnerships at every level, and within all of our communities to support our vision and mission, which we deliver through five Service Areas:

- Watershed Management Services
- Conservation Services
- Watershed Research Services
- Community Outreach Services
- Corporate Services

2020 Budget Summary

WATERSHED MANAGEMENT SERVICES

PROGRAM REVENUES: \$1,456,512

PROGRAM EXPENSES: \$1,456,585

Watershed Management Services ensures that development in the Region progresses in a sustainable manner, is directed away from natural hazards, protects natural heritage features, and protects our water resources.

We are working towards a planning first principle which ensures that planning permissions are in place before we consider any approvals under the Conservation Authorities Act.

Watershed Management Services are delivered through four programs:

- Watershed Planning
- Development Services
- Water Resources Engineering
- Flood Management

WATERSHED PLANNING

ERCA assists municipalities in watershed planning to meet Planning Act/Provincial Policy Statement responsibilities by identifying natural hazard and natural heritage features and providing policy support and advice related to natural heritage systems, development and stormwater servicing, water quality and natural resource planning concerns.

2019 Achievements

- Over 900 planning applications were submitted to ERCA under the *Planning Act* (Zoning By-Law amendments, minor variances, consents, etc.). ERCA's review assists landowners and municipalities in reducing risks associated with flooding and erosion and protecting natural heritage, and ensures best practices for sustainable communities are being incorporated in planning and development.
- ERCA staff reviewed 13 Official Plans and secondary plans to ensure local planning decisions address ERCA provincial delegated authority responsibilities relative to natural hazards and to continue to advise local municipalities on natural heritage matters.
- ERCA responses to Province of Environmental Registry of Ontario policy consultations including the Made-in-Ontario Environment Plan, 10-Year Review of Endangered Species Act, Bill 66 (Restoring Ontario's Competitiveness Act, 2018), Conservation Authority permitting, and programs and services under Bill 108 (More Homes, More Choice Act, 2019), updates to the Canada Ontario Agreement, and changes to the Provincial Policy Statement among others.

2020 Actions

- Undertake consultations and finalize ERCA's Place for Life Policies related to plan review and permitting processes in the region, and integrate related policies associated with other ERCA programs and services and to ensure consistency with recent changes to the Conservation Authorities Act (2017, 2019) and current provincial direction and best practices.
- Negotiate Memorandum of Understanding for Planning Services with municipalities to provide clarity around ERCA's involvement in plan input and review of planning applications under the Planning Act as an agency with provincially delegated responsibility for the natural hazards; as a municipal technical advisor; as a public body and as a landowner.

2020 Pressures

- Uncertainty around legislative amendments and provincial review of conservation authority permitting processes and how that will impact delivery
- Capacity to become fully engaged in Municipal Official Plan processes to ensure natural hazards/heritage reflected in long-range planning while continuing to support operational planning and applications with same capacity
- Challenges with taking a proactive approach to planning to address urban growth, climate change, environmental degradation and the relationships between growth and resilience.

DEVELOPMENT SERVICES

ERCA administers the Development, Interference with Wetlands and Alteration to Shorelines and Watercourses Regulation, approved by the Minister of Natural Resources and Forestry and known as Ontario Regulation 158/06, as amended. The Regulation allows ERCA to control development within hazardous lands through a permitting process. These lands could be unsafe for development because of naturally occurring processes associated with flooding, erosion, unstable soils, dynamic beaches, unstable slopes or in areas where conservation of lands could be impacted by development. Our goal is to reduce risk to life, prevent damage to property, and reduce social disruptions resulting from natural hazards.

2019 Achievements

- Received and issued more than 1,300 permits, including over 300 for shoreline maintenance as a result of record high water levels in Lake St. Clair and Lake Erie. This is an increase of over 750 applications from 2015.
- Responded to over 1,300 Miscellaneous Development (MD) inquiries related to a questions about property matters, or from prospective purchasers with questions concerning a potential property purchase.
- Implemented new Client Centric service standards for high growth area Conservation Authorities and reaffirmed ERCAs Client Services Standards Policy to align with Conservation Ontario Client Services Standards guidelines.
- ERCA consistently meets and reports annually on Ministry service level standards of a 20-day turnaround for permit reviews and will update its reporting standards to also reflect new, more timely, Conservation Ontario standards and processes.

2020 Actions

- Undertake a 3rd party Fee Analysis for planning and development services including consultation engagement and with municipalities, Windsor Heavy Construction Association and the Windsor Construction Association, and Windsor Essex Economic Development Corporation in review and recommendations for program delivery
- Continue to improve excellence in client services by seeking ways to reduce review timelines in keeping with Conservation Ontario Client Services Standards guidelines.
- ERCA anticipates permit numbers to remain high as a result of sustained damages to existing protection systems through 4 years of increasingly high water levels and storm events.

2020 Pressures

- Increasing growth and development in the region.
- Increased demand on compliance staff as it relates to legal action
- Development services review operates at a 65-70% cost recovery basis. Currently, ERCA does not charge fees for miscellaneous development inquiries, making higher or full cost recovery difficult to achieve.

WATER RESOURCES ENGINEERING

Managing the risks associated with the natural hazards of flooding and erosion is one of the primary roles of conservation authorities under the *Conservation Authorities Act*. We fulfill this role through the delivery of multiple natural resource management programs and services, including flood plain management and mapping, water and erosion control infrastructure planning, and stormwater management.

2019 Achievements

- Finalized Stormwater Management Guidelines with municipalities to ensure a consistent set of standards for managing stormwater designs and submissions.
- Reviewed with municipalities the status of current WECl projects (Lakeshore and Windsor) and pursued potential opportunities for future funding of WECl projects with municipalities (Amherstburg and Essex)

2020 Actions

- Coordinate regional Hazard Mapping Scoping and Prioritization program with Municipalities, City of Windsor and County of Essex
- Assist in the development of Shoreline Management Plans in Lakeshore, Leamington and continue to lead the Little River Hazard Mapping study at the request of the City of Windsor
- Work with partners to develop short- and long-term plans to address the existing and expected impacts to our region as a result of current and future water levels, flood and erosion hazards, and climate change.
- Explore opportunities to build Green Infrastructure Design Guidelines into Regional Stormwater Management Guidelines.
- Work with Kingsville to ensure Greenhouse policies and greenhouse developments address stormwater and drainage as part of the overall municipal drainage scheme and watershed.

2020 Pressures

- Increasing growth and development in the region.
- Increasing involvement and leadership of special studies with limited capacity

FLOOD MANAGEMENT

We recognize that protection of life and property from flooding and erosion hazards is dependent on natural system protection, restoration and remediation; and that development and redevelopment should contribute to the prevention, elimination, and reduction in risk from flooding, erosion, and slope instability. We follow the five pillars of flood management: prevention, mitigation, preparedness, response and recovery.

2019 Achievements

- ERCA hosted four High Water Information Workshops in Lakeshore, Windsor, Kingsville and LaSalle, to raise awareness of impacts of high water to 1,500 attendees
- Monitored 30 Climate Stations, including 18 within the City of Windsor. ERCA staff initiated discussions with Lakeshore and Essex regarding siting and integrating 6 additional stations.
- Met with Provincial Flood Advisor, and participated in SW Ontario Regional CAOs meetings regarding flood management, flood protection and emergency response. Flood Advisor's report includes recommendation that ERCA and Lower Thames Valley CA work with Windsor-Essex municipalities, Chatham-Kent, Province and Federal Government to develop a short- and long-term plan to address flooding and shoreline/infrastructure issues in Lake Erie/Lake St. Clair/Detroit River.

2020 Actions

- Implement upgrades and expansions to the Essex Region Watershed Monitoring network including ERCA and municipal Climate Stations to assist in providing flood response, monitoring and reporting
- Further refinement of the ERCA Flood Contingency Plan to include additional flood forecasting stations and additional weather and lake level sources.
- Mentor junior staff on systems operations and train on advisory roles

2020 Pressures

- All-time Record High Water Levels for Lake Erie and Lake St. Clair (and Detroit River). As a result of high water levels, since the beginning of 2019, Essex Region was under Watershed Condition (48 days)/ Flood Watch (147 days) or Flood Warning (25 days) more than days with no warning in effect. Extreme weather events increases pressure on staff and resources. This is expected to continue in 2020.
- Change in winter weather patterns means more rains/less snow, likely to continue with more early to mid-winter floods, loss of ice cover, and erosion.
- Provincial funding for ERCA's Section 39 Eligible Natural Hazard Management Grant (flooding and erosion programs), which has been \$202,000 since the mid 1990s, was reduced to \$104,000 in 2019. Despite CA appeals to not reduce or eliminate any further transfer payments, continued funding is uncertain.

2020 Budget Summary

CONSERVATION SERVICES

CW~GS Restoration	\$3,449,820
Public Conservation Areas	\$1,053,611
Holiday Beach CA	\$296,150
John R. Park Homestead	\$286,267

PROGRAM REVENUES: \$5,106,305

PROGRAM EXPENSES: \$5,106,848

The goals of ERCA's Conservation Services programs are to protect, restore, and manage natural heritage areas and systems within ERCA's watersheds. We do this through management of a system of Conservation lands, strategic and leveraged investment in land securement, and by identifying and implementing restoration projects.

Conservation Services are delivered through three programs:

- Public Conservation Areas
- Management of Natural Spaces
- Clean Water~Green Spaces Restoration

PUBLIC CONSERVATION AREAS

Since 1974, ERCA has been acquiring lands to ensure the protection and conservation of their significant natural and cultural heritage features. Our Conservation Areas ensure that valuable greenspace is protected and that recreational opportunities are provided in safe, well maintained natural settings so that our watershed residents can enjoy a high quality of life and build greater awareness and appreciation for the landscapes around them.

These goals, as well as support for regional trails and trail networks, were originally identified in ERCA's first program and policy recommendations for the same reasons as today. By allowing for the enjoyment of our properties, we generate grass roots support for environmental protection and cultural appreciation. As a result, many of our properties serve two functions - protection and recreation.

2019 Achievements

- Responded to high water and clean up after severe storm events at Holiday Beach that additionally required closure of Tremblay Beach CA, and areas within HBCA, HMCA and ERCA's Greenways. This included the removal of over 500 hazardous trees.
- Holiday Beach (30,000), John R. Park Homestead (18,000) and Hillman Marsh (8,000) visitors enjoyed the kinds of outdoor natural and cultural experiences known to contribute to community-wide health and well-being
- \$432,000 investment in Conservation Areas resulted in new boardwalks and road resurfacing at Holiday Beach Conservation Area as well as the Enbridge Natural Playground and the University of Windsor Alumni Association Outdoor Classroom
- Undertook shoreline engineering study to identify options to protect the historic John R. Park Homestead buildings.

2020 Actions

- Construct new pedestrian bridge over a municipal drain on the Cypher Systems Group Greenway to improve trail safety and not impact aquatic habitat.
- Complete road, parking lot, and facilities improvements at Holiday Beach and develop and build a new single track cycling facility at Holiday Beach (with Amherstburg Community Foundation)

- Finalize design and construct new Heritage Centre and shoreline protection to protect the historic buildings at the John R. Park Homestead
- Continue to replace entrance signs and directional signs leading to our Conservation Areas and explore opportunities for new or leveraged investment in capital facilities and infrastructure

2020 Pressures

- New ERCF supported investment in Greenways along with increased visitation and use of conservation areas but available funds to support trail and conservation area operations has not kept pace
- Funding to maintain infrastructure to the levels recommended in Tangible Capital Asset Management Plan and infrastructure replacement reserve funds and consider new capital investment and programming to meet changes in visitor use and expectations.
- Unexpected costs related to increasingly unpredictable storm events and high water levels that are having significant financial implications related to clean up from storm and erosion damage (over \$50,000 in 2019), and revenue losses due to flooded campgrounds and temporary closure of Conservation Areas
- Managing risk at CAs in light of increasing liability and costs to maintain lands

MANAGEMENT OF NATURAL SPACES

The Essex Region supports a higher diversity of plant and animal species than any other region in Canada, and sustains one of the highest concentrations of globally rare species in an area with some of the lowest percentage of natural cover in Canada. Our Conservation Areas are managed to protect this natural heritage, preserve human and cultural heritage, and support active and healthy living, outdoor education, and increase awareness and appreciation of our natural and cultural heritage.

2019 Achievements

- Completion of the Collavino Wetland controlled water wetland project
- Finalized the Peche Island permitting processes with regulatory agencies
- Initiated the Cedar Creek Management plan
- Continued control of invasive species at Spring Garden Natural Area

2020 Actions

- Complete management plans for Cedar Creek and John R. Park Homestead
- Facilitate the donation of the Collavino wetland to ERCA and the initiation of a management plan to allow the public to enjoy this site
- Initiate the construction of the Peche Island erosion protection and fish habitat project with partners (City of Windsor, SwimDrinkFish, Environment Canada)
- Continue to explore opportunities for new or leveraged investment in natural resource management
- Complete the Peche Island Habitat/Shoreline, and Canard River wetland projects

2020 Pressures

- Invasive species continue to threaten our natural spaces and the work we do to restore our natural spaces. The cost to control invasive species such as Phragmites continues to grow
- ERCA has limited resources to undertake compliance of our regulations in natural areas to deal with issues such as poaching
- Erosion of our natural coastlines continues to deplete unique habitat and species
- Detroit River AOC funding is uncertain after 2020

CLEAN WATER~GREEN SPACES RESTORATION

Of all the Great Lakes, the western basin of Lake Erie is exposed to the greatest stress due to urbanization, industrialization, and rural land use and is exhibiting signs of degradation including nutrient and phosphorus enrichment, the emergence of harmful algal blooms, and other water quality issues that impact aquatic habitat, drinking water, and ultimately the health and economy of the Essex Region. These challenges are inter-related, and solutions must be as well.

ERCA's Clean Water ~ Green Spaces (CW~GS) program was designed to address two of ERCA's highest priorities; protecting and enhancing water quality, and protecting and restoring natural areas by providing local funding to leverage support from provincial, federal, landowner and other partners to collectively improve water quality and enhance protection and restoration of natural areas. We leverage local funding through this program to support land securement, restoration (stream/drain, natural channel design, shoreline and fish habitat improvement, prairie/forest/wetland) soil and water actions such as providing in-field and in-stream conservation planning and delivery of agricultural stewardship, demonstrating innovative water and soil conservation (e.g. demonstration farm/projects) are included in Watershed Research Services.

2019 Achievements

- ERCA planted almost 60,000 trees on public and private lands, creating an additional 13.5 hectares (35 acres) of new canopy and monitored 50 restoration sites showing 85% tree survival rates
- Continued monitoring of Oak Wilt Disease
- Represented our region on the Forest Gene Conservation Association Board of Directors which is creating a forest focused climate change adaptation plan for the Essex Region

2020 Actions

- Work with municipalities to develop a report related to Habitat Compensation/Mitigation, and opportunities for implementation of Essex Region Natural Heritage System Strategy
- Continue to target high priority restoration sites to help meet our goal of 12% natural area cover
- Plant 28 hectares of new forest and plant 80,000 trees
- Research and provide a report regarding carbon sequestration related to restoration efforts

2020 Pressures

- Cuts to the 50 Million Tree Program may have led to a shortage of trees from nurseries across Ontario
- Barriers to restoration makes it increasingly difficult to secure landowner projects, for instance, restoration of agricultural lands removes land from agriculture designation, resulting in higher taxes, makes it increasingly challenging to implement private landowner projects. Opportunity for municipalities to offset increased taxes through incentives or other tax benefits to support restoration efforts.
- 2019 Spring season was significantly impacted by weather resulting in many projects being postponed or abandoned. Continued above average spring rain will have an impact on the number of projects ERCA is able to achieve each year.
- Increasing changes (budget reductions or geographic priorities) to federal and provincial restoration grant opportunities is making it very challenging to match CW~GS restoration and acquisition leveraging opportunities.

2020 Budget Summary

WATERSHED RESEARCH SERVICES

- Watershed Science \$850,950
- Source Water Protection \$102,600
- Climate Change \$117,500

PROGRAM REVENUES: \$1,071,050

PROGRAM EXPENSES: \$1,068,850

ERCA's Watershed Research Services programs aim to protect our local watercourses and sources of drinking water through increased uptake up of agricultural Best Management Practices, enhanced monitoring and policy implementation. We have strengthened our relationship with the University of Windsor, and are active participants in several ongoing research programs that will improve our understanding and allow us to tailor solutions that are best suited to our unique ecosystem.

Watershed Research Services are delivered through three programs:

- Source Water Protection
- Watershed Science
- Climate Change

SOURCE WATER PROTECTION

Administered under the Clean Water Act, the watershed-based Source Protection Program is the first step in a multi-barrier approach to protect drinking water. It complements municipal water treatment and supports sound land use planning decisions. ERCA, and other conservation authorities, have designated responsibilities under the Clean Water Act to work closely with stakeholders to ensure that our sources of municipal drinking water are safe and abundant.

2019 Achievements

- Began required updates to the Essex Region Source Protection Plan and Assessment Report to ensure that our sources of drinking water are protected using the most current information available
- Worked with municipal and provincial implementing bodies to implement 50 policies designed to protect our sources of drinking water
- Completed 28 Risk Management Plans to address Significant Drinking Water Threats on behalf of municipalities

2020 Actions

- 45 Risk Management Plans to address Significant Drinking Water Threats on behalf of municipalities to be completed in 2020
- Continue updates to the Essex Region Source Protection, Section 36 Assessment Report and Annual Report.

2020 Pressures

- Source Water Protection identified as a Mandatory Program and Service in the Conservation Authorities Act, though continued funding remains uncertain

WATERSHED SCIENCE

Healthy watersheds are key element to the Place for Life. Our ability to track and report on changes to our watersheds and share that knowledge helps assess and understand current health and emerging trends as a basis for setting environmental management priorities, identify research gaps, and manage, protect or enhance watershed resources. ERCA undertakes its watershed science programs through partnerships with the Provincial Water Quality Monitoring Network, Ontario Benthos Biomonitoring Network and the Provincial Groundwater Monitoring Network. We also work with GLIER at the University of Windsor, Soil and Crop Associations and industry to encourage and monitor environmentally sustainable farming practices, and to support environmental stewardship, knowledge transfer, CW~GS incentive grants and collaborations.

2019 Achievements

- Monitored surface water quality at 50 sites and groundwater quality at 8 sites around the region. In total, ERCA staff collected more than 2,500 water quality samples to evaluate watershed health
- Monitored phosphorous levels getting into Lake Erie at the innovative 10 acre University of Windsor Alumni Association Wetland at Hillman Marsh with University of Windsor Biochemistry department.
- Initiated development of a Phosphorous Management Plan with support from Environment and Climate Change Canada
- Completed over 25 agricultural best management (e.g. cover crops, nutrient management plans, buffer strips) on over 500 hectares of land with support from Environment and Climate Change Canada as part of the implementation of the Lake Erie Action Plan.

2020 Actions

- Continue development of a regional Phosphorus Management Plan and calculation of phosphorous loading in Leamington tributaries
- Expand water quality monitoring program with support from the OSCIA through the ONFarm program and MECP.
- Initiate a new partnership with Agriculture Canada as part of Canada's Living Lab program
- Develop and implement over 50 nutrient and soil health projects with the farming community.

2020 Pressures

- Collection of the environmental data, analysis and calculation of the phosphorus concentrations to Lake Erie and the Leamington Tributaries are supported through provincial funding under the Canada-Ontario Agreement (COA). The continuation of this funding is uncertain after October 2020
- Traditional Environment Canada and Ministry of Agriculture and Rural Affairs funding to further applied research and innovative projects related to water quality has ceased

CLIMATE CHANGE

The Essex Region has experienced the impacts of changes to our landscapes over the last decade. We are experiencing hotter summers, warming Great Lakes, rising lake levels, warmer winters, increased rain events and more frequent, severe storms. These changes affect every part of our lives. While efforts to slow this change must continue, we also need to help our region adapt to its impacts. To most efficiently and effectively undertake and advance this, we need to work together to improve knowledge and advance the understanding of climate change, identify risks and vulnerabilities, enhance regional preparedness; and gaps in knowledge; policy and programming related to terrestrial, aquatic and nearshore systems, infrastructure, water quality and quantity, agriculture and communities in the Essex Region.

2019 Achievements

- Initiated the Windsor Essex Climate Change Collaborative (WEC3), which includes sector-based Implementation Teams, including Human Health, the Built Environment, Natural Hazards, Agriculture, Nature & Ecosystems, and Energy. Developed a framework for assessing impacts for these sectors.
- Secured funding and commitments from Ministry of Energy, Northern Development and Mines, County of Essex and municipalities for a county-wide Community Energy Plan to help advance regional priorities around energy conservation to achieve lower emissions.
- Created a Climate Change Communications Strategy to help stakeholders at all levels understand local impacts of climate change and actions that can be taken toward mitigation and adaptation
- Hosted municipal Climate Action Symposium with University of Windsor

2020 Actions

- Host a 2020 WEC3 workshop series, which will include sessions such as Corporate Energy Planning, Asset Management, and Stormwater Financing, to help municipalities prepare and plan for climate change.
- Initiate County-wide Community Energy Plan with County of Essex, county municipalities, residents and industry.
- Sector engagement by framework, with focus on Nature & Ecosystems and Agriculture.
- Continue to develop outreach and education actions on climate mitigation and adaptation

2020 Pressures

- As awareness increases, there may be an increased interest and requests for support from agencies and municipalities
- Increased demand for education and outreach (general) and public consultation (for the CEP)
- Capacity issues with need to support development of Climate Change Plan and County Municipal Energy Plan with municipalities and partners

2020 Budget Summary

COMMUNITY OUTREACH SERVICES

- Outreach and Engagement \$239,950
- Communications \$186,050
- Outdoor Education \$85,300

PROGRAM REVENUES: \$511,400

PROGRAM EXPENSES: \$509,600

Community Outreach Services are critical to engaging regional partners in conservation practices toward climate action and a sustainable environment. Communications and outreach services support all business units of the Authority, including engaging landowners in conservation practices, educating students of all ages about environmental sustainability, promotion of and engagement in tree planting and restoration, connecting people to nature through a variety of programs and events, identifying the value of

natural connections to our health, and communicating broadly with stakeholder groups.

Community Outreach Services are delivered through three programs:

- Outdoor Education
- Outreach and Engagement
- Communications

OUTDOOR EDUCATION

There is a significant body of research-based evidence surrounding the value of outdoor learning experiences. There is also increasing demand within the education sector for programs and services that focus on environmental issues that are important today. ERCA's Outdoor Education programs provide experiential and engaging environmental programs and services for kindergarten to grade 12 students and teachers, meeting the objectives of the provincial curriculum.

2019 Achievements

- Provided curriculum-based outdoor education for nearly 15,000 students, including delivery of Special High Skills Major Certifications
- Expanded French-language human and natural heritage history programs, and introduced a new interpretive Monarch Life Cycle education program
- Introduced new Indigenous Education program which was profiled amongst Conservation Authority educations across the Province.

2020 Actions

- Scaling up the pilot Indigenous Education Program to all school boards in partnership with local First Nations
- Expand school-based program offerings during shoulder season to broaden impact while responding to increasing bussing cost pressures.

2020 Pressures

- Costs of bussing costs makes travel to conservation areas to access our outdoor education programs difficult for some schools – usually the schools who would derive the most benefit from these programs due to geographic and socio-economic conditions.
- Aging facilities and accessibility issues remain at Hillman and Holiday Beach
- Uncertainty surrounding provincial support for operations of JRPH as a community museum

OUTREACH AND ENGAGEMENT

Community programming (tree planting, cleanups, native gardens, workshops, events, tours, etc.) provides unique grass-roots learning opportunities for residents, stakeholders such as farmers, developers and others to engage in initiatives that promote sustainable communities, increase awareness of our impact on our landscape, inspire stewardship action, and connect people to our landscapes and the health of our watersheds.

2019 Achievements

- 32 outreach events engaged more than 4,200 regional residents in conservation programs and activities, including creating the Rotary Legacy Forest, the Solcz Family Foundation Forest, and Climate Action Symposium
- Enhanced Citizen Science Programs included Project Purple, Seed Collection, Garlic Mustard Pulls and Tree Monitoring and Assessment
- Youth Engagement Ambassador (YEA) Team and How-To Crews were revitalized, providing community volunteers with an advanced level of training to assist with proper tree planting techniques during large scale outreach events

2020 Actions

- Undertake a comprehensive cross-sectoral engagement review and develop strategies to meet gaps
- Continued enhancements to Citizen Science programs to meet regional environmental objectives
- Continue to streamline schoolyard greening and corporate engagement events
- Continue to improve nature and heritage event implementation to engage more participants

2020 Pressures

- Uncertainties around shared funding supports with Detroit River Canadian Cleanup
- Increasing requests for engagement opportunities and delivery of donor-related opportunities compete for capacity due to shared position
- Increased need for seed collection capacity support during fall outreach season

COMMUNICATIONS

Corporate Communications provides strategic guidance, tools and tactics designed to inform, inspire, influence and motivate municipal, provincial, federal partners, stakeholders and people of all ages in our watershed communities to take action towards creating a sustainable environmental future for our region.

2019 Achievements

- Collaborated provincially on a communications strategy demonstrating the critical importance of Conservation Authorities in protecting the people of Ontario from the impacts of our changing climate.
- Implemented significant improvements to our digital media platforms to streamline customer service for a variety of business units, including permit applications
- Engaged 35 staff in Indigenous Relationship Building training to improve consultation, collaboration and partnerships with Indigenous communities

2020 Actions

- Develop metrics and tools to better evaluate engagement strategies and initiatives.
- Create the range of tools and implement actions identified in the Climate Change Communications Strategy for shared use amongst all municipalities.
- Continue to evaluate, innovate and implement improvements across our digital platforms for streamlined and enhanced customer service.

2020 Pressures

- Increasing demand for program-related Communications strategies and support from all service areas.
- Increasing demand for customer service and engagement through a growing number of platforms.
- Increasing requirements to meet AODA standards

2020 Budget Summary

CORPORATE SERVICES

Corporate Services \$978,534

ERCA's Corporate Administration, Financial Services, Human Resources and Information Management Systems are integrated within the Corporate Services budget.

PROGRAM REVENUES: \$980,050

PROGRAM EXPENSES: \$978,534

Corporate Services provides leadership and management in the delivery of services central to the successful functioning of the entire organization. Corporate services is an enabling service.

Corporate Services supports the other Program areas in the organization through four program areas.

- Corporate Administration
- Financial Services
- Human Resources
- Information Management

CORPORATE ADMINISTRATION

ERCA's Corporate Administration office, led by the CAO, provides expert knowledge, strategic advice and recommendations to the Board of Directors with regard to policy, program and budget decisions. The CAO also provides operational leadership to ERCA staff, and influences processes, decisions and implementation with the goal of advancing our vision and mission and the objects of the Authority. Administration also ensures broad corporate compliance with multiple pieces of legislation.

2019 Achievements

- Implemented new comprehensive Corporate Administration By-Laws as legislated under the 2017 Amendments to the Conservation Authorities Act.
- Met with municipal, City and County CAOs to provide updates on shared initiatives, and identify opportunities for future partnerships

2020 Actions

- Consultation towards the development of new regulations pursuant to the Conservation Authorities Act to ensure CAs and municipalities can find the best local solutions to support community resilience
- Encourage the province to adopt a fourth mandatory program that helps to achieve the Made-in-Ontario Environmental Plan actions for clean water, climate change resiliency, and conserving land & greenspaces
- Continue to lead the Essex Region Conservation Foundation
- Cultivate partnerships/Municipal and Regional CAOs

2020 Pressures

- Changes in delivery of programs and services through Conservation Authorities Act, the identification of activities related to provincial and local programs and services and the development of municipal Agreements and transition periods uncertain.

FINANCIAL SERVICES

Solid financial management is the hallmark of strong and sustainable organizations. Understanding business processes and how they affect financial outcomes, along with the ability to make necessary changes successfully is paramount for a modern organization. ERCA's Financial Services group supports

Conservation Authority and Foundation staff, members and programs through budgeting, financial controls, accounting, procurement, and administration of payroll and benefits to ensure financial accountability to municipalities, funding partners, senior levels of government and other stakeholders.

2019 Achievements

- implemented a number of mechanisms to ensure that its activities are transparent to member municipalities and watershed residents to ensure that program and services aligns well with the proposed provincial mandatory programs and services and with the expectations of our member municipalities
- Upgraded financial software

2020 Actions

- Finalize a comprehensive procurement policy to address changing needs and support fair and transparent procurement. Develop and implement an e-procurement tool to improve the internal workflow
- Update the asset management plan, with long term financial strategy, to ensure a sustainable approach to asset replacement
- Enhance focus on internal controls and business processes, to effect savings, minimize asset/resource losses and streamline operations.
- Develop new 5-Year Sustainability Plan to support initiatives identified in the Strategic Plan and to ensure that ERCA has the appropriate resources, managed in the most effective and efficient way, to support the watershed and its municipal members' requirements.
- Promote ways to create awareness and support the authority's financial pressures and sustainability goals through staff and board training and information sharing.

2020 Pressures

- Budget pressures to minimize the tax levy requirements from funding partners, while still achieving strategic plan activities

HUMAN RESOURCES

Responsible for the effective management of people in the organization through the provision of services such as staff recruitment, health and safety, diversity, inclusion and accessibility, employee learning and development, benefit and insurance administration and performance management. ERCA's HR program works within an increasingly complex environment and a need to reflect and respond to changes in legislation, regulation, and business practices and works with management and staff to create and maintain a healthy and supportive culture and build staff morale.

2019 Achievements

- Recruited and hired two permanent positions - Multimedia Specialist and Administrative Associate, Corporate Services and the DRCC Remedial Action Plan Coordinator (Special Grant Employee)
- Completed Employee Engagement Survey, identified and implemented actions including enhanced internal communications, formalized staff meeting schedules, and re-introduced and empowered internal Green Team
- Introduced Annual Work Plan/Performance Review and Professional Development standards for all staff and updated several key HR policies and related programs.

2020 Actions

- Develop a succession planning program to identify, develop and evaluate upcoming organizational needs
- Continue development of priority Policies and Procedures/Employee Handbook
- Develop internship and volunteer program
- Refine employee/term/SGE onboarding/recruitment
- Finalize negotiations towards new Collective Agreement

2020 Pressures

- ERCA will need to replace key positions in the coming years. Succession planning and staff development are challenging with limited resources.
- Finding talent within a competitive environment
- Challenge with supporting needed organizational capacity in context of budget pressures and changes in programs and services and funding expectations

INFORMATION MANAGEMENT

Information Management is responsible for providing and managing secure, reliable and integrated information technology solutions in alignment with our business and strategic goals. ERCA has 40+ years of data and information collected through its programs and projects. This data is an important and valuable resource for ERCA and its University and research partners in helping to understand and address changes and challenges that our region faces.

2019 Achievements

- Updated Geocortex with 2019 Aerial photography in partnership with County of Essex and municipalities
- Acquired Lidar-derived DEM from Provincial open data source and corrected its vertical datum to CGVD28:78 to align with ERCA's operational datum.
- Installed Filehold enterprise-content-management software in preparation of beta-test records scanning.
- Optimized the new to make it more usable

2020 Actions

- Beta-test Filehold ECMS with finance records and permanent records of Watershed Management Services
- Launch an Open Data portal for public access to spatial data holdings.
- Launch a self-service purpose driven GeoCortex property explorer to aid landowners to determine if their property is subject to ERCA regulations.
- Additional servers to be migrated and virtualized (includes some server-based software to be upgraded). Other new virtual servers to be created as well.

2020 Pressures

- There has been a significant increase in provincial, municipal and public expectations for information, analysis tools, and predictive modeling
- The need for maintaining larger and more complex data holdings for continuing program support and analysis continues to increase
- As storage space requirements continue to grow, enterprise grade storage solution may be required

Summary

Capital and Operational Reserves

The 2020 Budget includes the continued management of the following reserve accounts (see attached Reserves Schedule).

Infrastructure Replacement

The Infrastructure Replacement reserve provides for expenses associated with the replacement or rehabilitation of existing capital infrastructure as well as specific new assets, when restricted donor or grants are available.

For 2020, the infrastructure budget accounts for a \$250,000 transfer to the infrastructure reserve, \$10,000 in anticipated interest revenues and \$14,250 in transfers from the Foundation, relating to multi-year funding agreements. The 2020 capital plan directs significant investment in Holiday Beach infrastructure, and the John R. Park Homestead consistent with the asset management plan (AMP) but also incorporates new assets, funded entirely from funds raised by the Foundation. Specifically, the proposed \$1,452,000 of capital investments for 2020, are as follows:

- **John R. Park Homestead Break Wall reconstruction (\$250,000).** With the record high water levels seen in Lake Erie this year in combination with expected deterioration, the John R. Park Homestead will be upgrading its break wall to ensure the ongoing and long term protection of this historic site. The project will also include some safe public access areas and seating for the public to enjoy a view of the lake. Administration will also be making a Water Erosion Control Infrastructure (WECI) application to extend the shoreline protection to the mouth of Fox Creek.
- **John R. Park Homestead Heritage Centre (\$691,000).** ERCA received \$600,000 for construction of a new Heritage Centre to meet demands of its outdoor education program that its existing 40-year old facility (a converted grain barn) does not provide. The facility will also serve as a welcoming/tourism space with adequate washroom facilities and office spaces to improve student and visitor experiences. The ERCF has launched a campaign to match funding received from the Federal Grant. Architects were hired in 2019 and construction is to be completed by December 2020.
- **Holiday Beach Conservation Area Workshop (\$300,000).** A new workshop was scheduled to be built in 2019; however, the tendered prices were not within our budget. ERCA is now working with an engineering firm to reduce the construction fees. The new building will most likely involve a complete renovation of the existing building instead of building in a new location, which will substantially reduce servicing costs and reduce our environmental footprint by reusing building materials.
- **Holiday Beach Playground and Classroom (\$35,000).** ERCA in partnership with our Foundation has begun the construction of the Enbridge Natural Playground and the University of Windsor Alumni

Association Outdoor Classroom. Both of these projects will be competed and opened in spring 2020.

- **Holiday Beach Road and Parking Lot Resurfacing (\$121,000)**. Phase 2 of resurfacing the roadways will be implemented in 2020. In addition to the roads receiving their final treatment, the parking areas that are currently closed to traffic due to their deteriorated condition will be upgraded and opened.
- **Greenway Bridge (\$30,000)**. ERCA is working the Town of Essex through the *Drainage Act* process to building a pedestrian bridge over outer drain, which runs alongside the Town of Essex Sewage Treatment Plant. The new design will include a precast concrete slab and railing to span the drain instead of a traditional culvert. This will result in a crossing that does not interfere with drainage or remove habitat for aquatic species.
- **Conservation Area Signage (\$15,000)**. Many of ERCA's entrance signs are beyond their useful lifespan and in need of replacement. In addition, there is a need to work with municipal partners to install replacement and new way finding signage so visitors can navigate to our conservation areas.

Operational Reserves

- **Revenue Stabilization** – As municipal levy accounts for slightly less than 40% of the Authority's 2020 operating expenses, the majority of revenues are from sources that may fluctuate in any given year due to economic conditions, changes in government agendas and mandates, and adverse weather. Given the instability surrounding Provincial commitments and transfer payment agreements, Administration is recommending a maintenance strategy to preserve existing balance of \$178,000.
- **Suite, Network, Office Equipment & Furnishings** – to provide for expenses related to the Authority's office equipment and furnishings, computers, servers and related software in accordance with useful life and functionality. In keeping with board direction, funds from the sale of ERCA's share of the Civic Centre are now included in this reserve. This reserve will be utilized in 2020 to support the records digitization project (software/scanners) and hardware replacement,
- **Human Resources** – to buffer against potential WSIB/NEER impacts, OMERS restatements, discretionary benefit fluctuations and unanticipated employment. No increase or utilization is proposed.

- **Legal & Insurance** – to buffer against unexpected insurance deductibles and claims below policy deductibles as well as unexpected legal expenses outside of the annual budget process. Replenishment of \$50,000 is included as this reserve was depleted due to two wind events not covered by insurance.
- **Vehicle/Field Equipment Replacement** – Vehicle and equipment expenses are recovered from accounts with outside funding, through a usage rate system, but most usage is associated with servicing conservation areas and core operations. Administration will continue to manage ERCA's fleet and equipment in an environmentally responsible manner in keeping with Board direction, however the significant additional costs associated with a greener fleet contributes to budget pressures and with the elimination of a provincial rebate program, this policy may need to be revisited.
- **Historic Properties Preservation/Maintenance** – to provide for major expenses related to preservation and maintenance of two historic properties that are to be preserved in perpetuity, specifically the John R. Park Homestead and the Kingsville Train Station. Due to the infrastructure replacement and major repairs required at the Homestead, the annual allocation has been utilized for several budget cycles. The 2020 budget includes a provision for replacement of the Train Station windows.
- **Tree Warranty and Self-Insurance (\$90,000 target achieved)** – to buffer against potential warranty claims for seedlings covered through the warranty program, and deterioration of seedlings related to weather related planting delays and which is cost prohibitive to insure.
- **Clean Water~Green Spaces Land Acquisition** (\$1.2 million balance: \$400,000 budgeted contribution in 2019 for an available total of \$1.6 million) – to support land acquisition efforts in keeping with ERCA's Land Securement Strategy, and as leverage for lands acquired with support from partners including senior levels of government.
- **Capital Reserve**. The Sustainability Plan identified that beginning in 2018, ERCA needs to contribute \$200,000 annually representing asset replacement values (historic cost basis) to fund capital reserves, consistent with the TCA report. Due to higher than anticipated costs for workshop replacement, an additional \$50,000 is to be contributed.

2020 Projected Reserves and Capital Plan											
	Capital Reserve	Revenue Stabilization	Grant Matching	Vehicle/Equipment	Suite/IT	Human Resources	Legal /Ins.	Historic Properties	Tree Warranty	Other Watersehd	Total Reserves
	Opening Balance (01/01/2019)	\$607,789	\$177,342	\$100,000	\$88,787	\$247,508	\$22,280	\$54,374	\$90,000	\$47,857	\$1,435,937

TRANSFER (TO)/FROM RESERVES	479,250	220,615	(141,550)	(42,031)
UNRESTRICTED SURPLUS/(DEFICIT) (DECREASES/(INCREASES))	\$ -	\$ (100,359)	\$ (119,569)	\$ (17,683)
OPERATING FUND DEFICIT (2)				

Note 1: The actual numbers shown for capital items for 2019 and 2020 will change once the assets under consideration are removed from the operating accounts and capitalized as tangible assets. Those accounting entries will not impact the estimated changes in the reserve funds or the unrestricted surplus.

Note 1: The 2019 operating deficit, estimated at ~\$119,000, will utilize the available accumulated surplus, as calculated on 12/31/2018.

KEY ASSUMPTIONS

That fee-for-service revenues relating to Watershed Management Services will stabilize at 2019 levels;

That revenues of \$546,000 for development applications and surveying fees will continue

That the revenues that were impacted by storms/floods will return to pre-2019 levels (hunting/camping/farm leases);

That grants will be available to support the new climate change regional initiative (~\$46,000)

The Provincial Section 39 Flood Forecasting & Warning program transfer payment will be maintained/capped at \$104,417

That the Drinking Water Source Protection activities will be funded at 100% of projected program costs (~\$96,000)

That municipal transfer payments of \$2.5M will be contributed for the Peche Island project

That significant watershed science and research grants will be approved (\$473,000)

That provincial transfer payments for DRCC activities will continue to October 2020

That revenues for the new JRP Heritage Centre will begin in 2021 and construction will somewhat impact 2020 revenues.

That CW-GS restoration revenues will continue to be impacted by loss of provincial special grant programs for tree planting and wetlands but 2020 operations will be funded with remaining deferred revenues but expected to be depleted in 2021.

That fee-for-service work for invasive species removal at Spring Garden will be negligible for 2020.
