The following comments reflect our role as representing the provincial interest in natural hazards as outlined by Section 3.1 of the Provincial Policy Statement of the *Planning Act* as well as our regulatory role as defined by Section 28 of the *Conservation Authorities Act*.

We have reviewed our floodline mapping for this area and it has been determined this site is not located within a regulated area that is under the jurisdiction of the ERCA (Section 28 of the *Conservation Authorities Act*). development of this site. We recommend that the municipality ensure through the Site Plan Control process that the release rate for any future development is controlled to the capacity available in the existing storm sewers/drains. In addition, that stormwater quality and stormwater quantity are addressed up to and including the 1:100 year storm event and be in accordance with the guidance provided by the Stormwater Management Planning and Guidance Manual, prepared by the Ministry of the Environment (MOE, March 2003) and the Windsor-Essex Region Stormwater Management Standards Manual.

If this property is subject to Site Plan Control, we request to be included in the circulation of the Site Plan Control application. We reserve to comment further on storm water management concerns until we have had an opportunity to review the specific details of the proposal through the site plan approval stage.
