**RE:** Application for Part Lot Control Exemption by  
Wobocorp Ltd.  
Lots 11 to 20 PLAN 12M689

---

## RECOMMENDED ACTION

1. That Part Lot Control By-law 35-2023 to allow Lots 11 to 20, PLAN 12M-689 to be exempt from Section 50(5) of the Planning Act **BE APPROVED**, and;
2. That Administration **BE DIRECTED** to forward By-law 35-2023 and the Part Lot Control Exemption application to the County of Essex for final approval, and to register any by-laws on title as required.

## BACKGROUND

The PLC exemption application applies to lots 11-20 on Plan 12M-689, which is part of the ongoing development of the Ridge Side Estate subdivision, Phase 1 and 2, located between Redwood Avenue and Bellevue Drive (see Appendix A Location Map). Plan 12M-689 was registered on March 11, 2022.

The developer has requested exemption from part lot control to reconfigure lots 11 to 20 into 20 blocks for development of semi-detached dwellings, eventually to be subdivided into 20 individual freehold units. In order to re-configure the lots an exemption from part lot control is required which then provides the developer the ability to convey the parcels via completion and registration of a reference plan. The subject lands are intended for the development of semi-detached dwellings which is consistent with existing development in the area (see Appendix B Sketch of Subdivision Layout).

## DISCUSSION

The subject properties are designated Residential in the Official Plan and zoned 'Residential Zone 2 Rural/Urban Exception 11 (R2.2-11)' under the Kingsville

Comprehensive Zoning By-law. The subject lands for the original Part Lot Control by-law consisted of ten (10) plan lots within the Ridge Side Estates Subdivision.

For a Sketch of the Proposed Lots, please refer to red lots overlaid on the original subdivision approval shown in Appendix C.

Once each semi-detached dwelling is constructed they are subdivided into individual freehold units. Exemption from part lot control is required to provide the developer the ability to convey the individual units via completion of a reference plan rather than individual consents (severance) on each parcel. This was the original intent at the time of the draft plan of subdivision and is the final step in the build out of the subject lands.

Subsection 50(7) of the Planning Act authorizes Council to pass a by-law providing that the part lot control provisions of Section 50(5) of the said Act do not apply to lands designated in the by-law. The application is not subject to a public hearing or appeal because Council has already approved the entire subdivision in principle and the zoning of the lands is in place to permit the use. This is a common approach for within a plan of subdivision for the creation of individual lots for semi-detached dwelling units.

As per the delegation of authority by-law, approval for a Part Lot Control application has been delegated to the Director of Community and Development Services. Council is still required to pass a by-law to be registered on title in order for the part lot control to be executed.

## **FINANCIAL CONSIDERATIONS**

There will be an increase in assessment value as a result of the completed development.

## **ENVIRONMENTAL CONSIDERATIONS**

None.

## **CONSULTATIONS**

No public or agency consultation is required by the *Planning Act* when considering a Part Lot Control Exemption By-law.

Kingsville Technical Advisory Committee was circulated for comments with the following comments:

### **Technical Advisory Committee (TAC)**

- The applicant shall ensure that any future applications for new dwellings meet the requirements of the Ontario Building Code. To help achieve this they should work with a qualified designer with a Building Code Identification number.
- Engineered lot grading plans should be submitted to Municipal Services and when

approved be sent to the building department labeled and noted with the final address indicated prior to applying for any building permits.

- Ensure new development water run-off does not adversely affect adjoining properties. Storm water engineer shall take into consideration existing conditions with neighboring properties to help prevent any flooding and/or run-off issues for their proposed design. A detailed plan should be created, and reviewed prior to proceeding and temporary measures should be identified and installed until permanent design is in place. Any existing property issues adjacent to the area of work should be put in writing to be forwarded to the appropriate properties to address.
- Ensure all building services are contained within existing property lines and do not cross over into newly established lines.
- The owner shall ensure all applicable laws have been met at time of permit application
- Future comments pending a full permit submission with permit drawings.
