**Subject:** land to be approved fro educational building - superschool

Dear Mr. Brown

I am writing in response to the letter we received with regards to changing the land on Jasperson Lane for the use of an educational building - the Super School!

I am very strongly opposed to the site becoming the super school in the location that you suggest in your letter..

There are a few reasons I would like to outline below:

I feel the site is not appropriate for such a large educational institution. The reason being that it is far too close to existing residential dwellings. As it will be a super school so potentially allowing 2000 students to learn at that facility not the mention all the staff required, I foresee that there will be a huge increase of traffic on the roads.

The existing roads will get a very high volume of traffic making it very noisy and unsafe for existing residents in the area. The infrastructure is just not good enough to allow that volume of traffic. Main Street and Division Road may get lighter traffic because of the lack of three schools that the super school will replace but that high amount of traffic would simply get moved to Peachwood Drive, Jasperson Lane and make these roads less desirable for people to live in. I am sure that I am not the only one thinking that they don't want their road to turn in to Main street particularly before school and after school.

I feel that a school of such dimensions if it is going to be in Kingsville, it need to not be so close to residents as not to distrube and disrupt good neighbourhoods that would change completely and lose their appeal. Peachwood Drive and Jasperson Lane are already becoming busier and that is just with the addition of a few new houses. Just think how much more traffic there will be once the super school is on that site? Wouldn't it be better to have such a large educational facility in a less populated residential area where existing resident sand roads will be less affected? There need to be more roads available to be able to deal and cope with the sheer amount of traffic that will be created. The intersection of Main Street / Jasperson Lane is already busy. I would hate to think how busy it would get with all the schol buses and cars driving doenw Jasperson Lane.

It seems to me that whoever decided that this should be the site for the super school is / are not really thinking of how it will affect people hwo live near the area of the suggested site.
