Subject: Zoning by-law amendment-abandoned/24/17. Noah Homes

Mr. French

In regards to this application from Noah Homes. In the original application Noah Homes managed to first get the original residential lot expanded to 4 acres then they said they wanted to make a residential/commercial business. I at this time objected because primarily I wasn't interested in having a business with equipment, junk and noise in the neighbourhood. The planning officer from the town strongly objected to the zoning change but our elected officials decided against a professional opinion. At this meeting we given a drawing of the proposed home and shop and told the house would be built in 5 yrs. Now as I look across the road all I see is one huge shop, piles of dirt, trucks, equipment and a pond. No house and no mention of one. So in closing I object to any changes because it has already gotten out of hand and there is no guarantee any promises will ever happen. Thank you, have a good day. Henry Vriesen.
